

Contents

I	Theory	1
1	Analysis of a Multigrid Algorithm for the Mortar Finite Element Method (BRAESS)	3
2	Optimized Schwarz Methods (GANDER, HALPERN, NATAF)	15
3	Dual and Dual-Primal FETI Methods for Elliptic Problems with Discontinuous Coefficients in Three Dimensions (KLAWONN, WIDLUND)	29
4	Decomposition of Energy Space and Virtual Control for Parabolic Systems (LIONS)	41
5	On Schwarz Methods for Monotone Elliptic PDEs (LUI)	55
6	Operator Theoretical Analysis to Domain Decomposition Methods (SAITO, FUJITA)	63
II	Algorithms	71
7	The mortar element method with overlapping subdomains (ACHDOU, MADAY)	73
8	Mesh adaptivity in the mortar finite element method (BERNARDI, HECHT)	83
9	Adaptive ENO-Wavelet Transforms for Discontinuous Functions (CHAN, ZHOU)	93
10	A Two-Stage Multi-Splitting Method for Non-Overlapping Domain Decomposition for Parabolic Equations (DAOUD, WADE)	101
11	Domain Decomposition and Splitting Methods for Mortar Mixed Approximations to Parabolic Problems (FAILLE, GAIFFE, GLOWINSKI, LEMONNIER, MASSON)	109

12	Mortar Projection in Overlapping Composite Mesh Difference Methods (GOOSSENS, CAI)	117
13	The direct method of lines for incompressible material problems on polygon domains (HAN, HUANG)	125
14	The Coupling of Natural BEM and Composite Grid FEM (HU, YU)	133
15	Direct Method of Lines for Solving an Elliptic Transmission Problem (KITAHARA, KOSHIGOE)	143
16	Finite Difference Method with Fictitious Domain Applied to a Dirichlet Problem (KOSHIGOE, KITAHARA)	153
17	New Interface Conditions for Non-overlapping Domain Decomposition Iterative Procedures (KWON, SHEEN)	163
18	On the Interface and Two-Level Preconditioners in Newton-Schwarz Method (LEE)	171
19	A Mortar Finite Element Method for Plate Problems (MARCINKOWSKI)	183
20	Bounds for Linear-Functional Outputs of Coercive Problems in Three Space Dimensions (PARASCHIVOIU)	191
21	Efficient and fast numerical methods to compute fluid flows in the geophysical β plane (SAKAJO)	199
22	Boundary Element Scheme with Domain Decomposition Approach for Moving Interface Phenomenon (SUGINO, IMAI, TOSAKA)	207
23	Two iterative substructuring methods for Maxwell's equations with discontinuous coefficients in two dimensions (TOSELLI)	215
24	FEM-FSM Combined Method for 2D Exterior Laplace and Helmholtz Problems (USHIJIMA)	223
25	A Parallel Interface Preconditioner for the Mortar Element Method in Case of Jumping Coefficients (VASSILEVSKI)	231
26	The Application of Operator Split Method to Large-Scale Reservoir Simulations Part I. a Priori Estimates (ZHANG)	241
III	Applications	249
27	Minimum Overhead Data Partitioning Algorithms for Parallel Video Processing (ALTILAR, PAKER)	251

- 28 The Mortar Element Method for 3D Maxwell's equations: analysis and application to magnetodynamics (BUFFA, MADAY, RAPETTI) 259
- 29 Solving non-linear electronic packaging problems on parallel computers using domain decomposition (CHOW, BAILEY, ADDISON) 271
- 30 A heterogeneous domain decomposition for initial– boundary value problems with conservation laws and electromagnetic fields (COCLICI, WENDLAND, HEIERMAN, AUWETER) 281
- 31 A Defect Correction Method for the Retrieval of Acoustics Waves (DJAMBAZOV, LAI, PERICLEOUS) 289
- 32 Numerical solution of vascular flows by heterogeneous domain decomposition methods (FATONE, GERVASIO, QUARTERONI) 297
- 33 Domain decomposition methods for a coupled vibration between an acoustic field and a plate (FENG, XIE) 305
- 34 Domain Decomposition for Kalman Filter Method and Its Application to Tidal Flow at Onjuku Coast (FUJIMOTO, KAWAHARA) 315
- 35 Two level Domain Decomposition for Multi-clusters (GARBEY, TROMEUR- DERVOUT) 325
- 36 A Domain Embedding Method for the Direct Numerical Simulation of Fluidization and Sedimentation Phenomena (GLOWINSKI, PAN, JOSEPH) 341
- 37 Parallel 3D Maxwell Solvers based on Domain Decomposition Data Distribution (HAASE, KUHN, LANGER) 353
- 38 A Fictitious Domain Decomposition Method for High Frequency Acoustic Scattering Problems (HETMANIUK, FARHAT) 365
- 39 Numerical computation for some competition-diffusion systems on a parallel computer (IKOTA, MIMURA, NAKAKI) 373
- 40 Domain Decomposition Method Applied to Radiation Problems (KAKO, KANO, LIU, YAMASHITA) 381
- 41 Application of the Domain Decomposition Method to the Flow around the Savonius Rotor (KAWAMURA, HAYASHI, MIYASHITA) 393
- 42 An Artificial Boundary Condition for the Numerical Computation of Scattering Waves (KOYAMA) 401
- 43 Domain decomposition methods for welding problems (LAI, IEROTHEOU, PALANSURIYA, PERICLEOUS) 411

44 FETI-DP: An Efficient, Scalable and Unified Dual-Primal FETI Method (LESOINNE, PIERSON)	421
45 A blackbox reduced-basis output bound method for shape optimization (MACHIELS, MADAY, PATERA, ROVAS)	429
46 Best N-term capacitance approximation on sparse grids (OSWALD)	437
47 Shape Optimization for an Acoustic Problem (SUITO, KAWARADA)	445
